What About Public Education?

**Rate Public Education in
Metro Area As a Whole**

**Rate Public Education in the
District Where you live**

"How would you rate your neighborhood as a place to live?" - By County

At the local level, all counties have a majority of residents who feel that their neighborhood is a good or excellent place to live. As the chart shows, Cherokee and Fayette have the highest percentages with 91% and 90.3% respectively. Clayton and DeKalb have the lowest percentages of people who would rate their neighborhood as excellent or good, as well as the highest share who would rate it fair or poor.

"Rate Public Education in District Where you Live" - By County

In most counties, a majority of respondents believe education is excellent or good in their own districts. Clayton, DeKalb, and Fulton are the only three counties that have a larger share of respondents who believe education is poor in their respective districts.

Big Changes

	YEARS				YEARS		
Population	1870	1940	2010	Labor force participation rates for selected sex and age groups*	1870	1940	2010
	39.9	132	308.7	Male 16-19	76.1	50.8	40.1
